

# **MUST-HAVE RESOURCES FOR OPEN SOURCE INTELLIGENCE (OSINT)**

# INTRODUCTION

Open Source Intelligence, or OSINT, is an essential skill for aspiring penetration testers to learn. OSINT techniques can help you uncover passwords and logins, develop successful social engineering campaigns, and identify risks to an organization. Luckily, there are many tools out there that can help enhance your OSINT methodology. The following list was developed from the resources you'll learn about in the Open Source Intelligence Fundamentals course in TCM Security Academy.

**Find the GitHub repo here:** <https://github.com/TCM-Course-Resources/Open-Source-Intelligence-Resources>

**See the course curriculum here:**  
<https://academy.tcm-sec.com/p/osint-fundamentals>

**Get OSINT certified with the Practical OSINT Research Professional (PORP):**  
<https://certifications.tcm-sec.com/porp>

# SOCK PUPPET RESOURCES

First, you'll need to create a sock puppet account to conceal your true identity and access content on various websites and applications where a login is required.

## **Intro to Creating an Effective Sock Puppet (Wayback Machine)**

<https://web.archive.org/web/20210307173507/https://jakecrep.s.com/sock-puppets/>

## **The Art Of The Sock**

<https://www.secjuice.com/the-art-of-the-sock-osint-humint/>

## **My Process for Setting up Anonymous Sock Puppet Accounts (Reddit)**

[https://www.reddit.com/r/OSINT/comments/dp70jr/my\\_process\\_for\\_setting\\_up\\_anonymous\\_sockpuppet/](https://www.reddit.com/r/OSINT/comments/dp70jr/my_process_for_setting_up_anonymous_sockpuppet/)

**Fake Name Generator** <https://www.fakenamegenerator.com>

## **This Person Does Not Exist**

<https://www.thispersondoesnotexist.com/>

## **Privacy.com**

<https://privacy.com/>

# SEARCH ENGINE OSINT

Knowing how to manipulate search engines can deliver a goldmine of information. Check out these resources for advanced searching:

## **Google Advanced Search**

[https://www.google.com/advanced\\_search](https://www.google.com/advanced_search)

## **Google Search Guide**

[http://www.googleguide.com/print/adv\\_op\\_ref.pdf](http://www.googleguide.com/print/adv_op_ref.pdf)

## **Bing Search Guide**

<https://www.bruceclay.com/blog/bing-google-advanced-search-operators/>

## **Yandex**

<https://yandex.com>

## **DuckDuckGo Search Guide**

<https://help.duckduckgo.com/duckduckgo-help-pages/results/syntax>

## **Baidu**

<http://www.baidu.com>

# IMAGE OSINT TOOLS

There are a few other image search tools that can aid your OSINT efforts:

## **Google Image Search**

<https://images.google.com>

## **Yandex**

<https://yandex.com>

## **TinEye**

<https://tineye.com>

# EMAIL OSINT

Finding a user's email address can be the first step in guessing their login or to launching a social engineering campaign. Use these resources to get started:

## **Hunter.io**

<https://hunter.io/>

## **Phonebook.cz**

<https://phonebook.cz>

## **VoilaNorbert**

<https://www.voilanorbert.com>

## **Email Hippo**

<https://tools.verifyemailaddress.io>

## **Email Checker**

<https://email-checker.net/validate>

# USERNAME OSINT

If the email address isn't the username, there are ways to search publicly available data for that as well! Check these out:

## **NameChk**

<https://namechk.com>

## **WhatsMyName**

<https://whatsmyname.app>

## **NameCheckup**

<https://namecheckup.com>

# PASSWORD OSINT

Once you have an email address and a username, you probably want to find a password to gain access to an account. One place to look is in previous data breaches:

## **Dehashed**

<https://dehashed.com>

## **WeLeakInfo**

<https://weleakinfo.to/v2>

## **LeakCheck**

<https://leakcheck.io>

## **SnusBase**

<https://snusbase.com>

## **HaveIBeenPwned**

<https://haveibeenpwned.com>

# SOCIAL MEDIA OSINT

Individuals divulge a lot of personal information on their social media accounts. These tools will help you efficiently search social media platforms.

## **Spoonbill.io**

<http://spoonbill.io>

## **Tinfoleak**

<https://tinfoleak.com>

## **Sowdust**

<https://www.sowsearch.info/>

## **IntelligenceX Facebook Search**

<https://intelx.io/tools?tab=facebook>

## **InstaDP**

<https://www.instadp.com>

## **ImgInn**

<https://imginn.com>

## **Snapchat Maps**

<https://map.snapchat.com>

# PEOPLE OSINT

There's a lot of information about individuals available online (one reason to improve your personal OPSEC!). Information found in these sources can be used to craft a convincing phish, divulge the answer to a security question, or hint at possible passwords.

## **WhitePages**

<https://www.whitepages.com/>

## **TruePeopleSearch**

<https://www.truepeoplesearch.com/>

## **FastPeopleSearch**

<https://www.fastpeoplesearch.com/>

## **FastBackgroundCheck**

<https://www.fastbackgroundcheck.com/>

## **Spokeo**

<https://www.spokeo.com>

## **That's Them**

<https://thatsthem.com>

## **Voter Records**

<https://www.voterrecords.com>

# PEOPLE OSINT

## **TrueCaller**

<https://www.truecaller.com>

## **CallerID Test**

<https://calleridtest.com>

## **Infobel**

<https://infobel.com>

# WIRELESS OSINT TOOL

Gather intel on wireless networks with this handy tool:

## **WiGLE**

<https://wigle.net>

# WEBSITE OSINT TOOLS

If you are pentesting a web application or looking for information on a company or its employees, these tools can help you find a way in.

## **BuiltWith**

<https://builtwith.com>

## **Domain Dossier**

<https://centralops.net/co>

## **DNSlytics**

<https://dnslytics.com/reverse-ip>

## **Virus Total**

<https://www.virustotal.com>

## **Visual Ping**

<https://visualping.io>

## **Back Link Watch**

<http://backlinkwatch.com/index.php>

## **View DNS**

<https://viewdns.info>

# WEBSITE OSINT

## **Pentest-Tools Subdomain Finder**

<https://pentest-tools.com/information-gathering/find-subdomains-of-domain#>

## **crt.sh**

<https://crt.sh>

## **Shodan**

<https://shodan.io>

## **Wayback Machine**

<https://web.archive.org>

# BUSINESS OSINT TOOLS

These tools can help you unlock information about a company's structure and important business data.

## **Open Corporates**

<https://opencorporates.com>

## **AI HIT**

<https://www.aihitdata.com>

# CONCLUSION

Check out the full list of resources on our [Github](#)! If you want to learn more about how to use these tools and develop an OSINT methodology, check out the [OSINT Fundamentals](#) course or the [Practical OSINT Research Professional](#) certification. We also offer an [Introduction to OSINT](#) live training that will provide hands on experience with many of the tools mentioned in this guide.
